

## Important Questions

### ★ Can I travel on an airplane without a Secure ID DL/ID?

Yes. If your current driver's license or ID card has not expired, it is still an acceptable form of identification for boarding a commercial flight and entering federal buildings.

### ★ Do I have to obtain a Secure ID DL/ID if my current license hasn't expired?

No. Existing licenses and IDs will remain valid until expiration at which time you must present documentation in person for issuance of a Secure ID DL/ID.

### ★ Will I have to do anything different to obtain a Secure ID DL/ID ?

Not really. You were required to provide the same types of documents to prove identity and address when you were issued your first GA license or ID. To better protect the identity of Georgia citizens, these documents along with your proof of SSN need to be seen at your next visit to DDS.

### ★ What are the benefits of Secure ID?

- Ensures the integrity of GA license or ID cards
- Reduces the opportunity for identity theft
- Meets upcoming federal requirements for boarding a commercial flight and entry into federal buildings
